Eliminating Decision Fatigue on Set

A private creative direction system delivering locked, campaign-ready Instagram shoot briefs to Creator Vault.

Generic Prompts Produce AI Sludge

Why 92% of creator videos stall before hitting algorithmic scale.

1. Opening Hesitation

Viewers swipe away in 1.5s because creators waste time saying hello instead of delivering visual tension at second 0.0.

2. No Scene Discipline

Wandering monologues with zero camera variation cause mid-video retention collapse across all short-form platforms.

3. Unsupportable Claims

Inflated marketing promises trigger audience skepticism and brand safety warnings from algorithmic reviewers.

Inside the Shoot Brief Dossier

Every brief answers the 5 critical production questions before filming starts.

Visual Hook (0–3s)

Exact mid-action opening image, tactile props, and high-tension first spoken words.

Scene Flow & Beats

Step-by-step physical actions, camera angles (wide, POV, macro close-up), and pacing.

Anti-Claim Boundaries

Clear boundaries on what claims are prohibited to ensure 100% brand credibility.
